

Why Nebula?

Measured results

Every model is validated against clear metrics before it reaches your team.

End-to-end delivery

From raw data to a deployed, monitored solution in the cloud (AWS).

Real domain experience

3+ years of R&D with clinical and biomedical data — 200K+ samples managed.

Bilingual partner

We work with you in English or Spanish, across the US and Latin America.

Let's talk about your data.

Tell us about your challenge and we'll come back to you with a clear next step.

NEBULA DATA STRATEGY LLC

Based in Clovis, California · Serving clients in the US & Latin America

NEBULA

DATA STRATEGY LLC

APPLIED AI & DATA STRATEGY

Turn your data into decisions.

Deep learning, data science and agentic AI that solve real problems in healthcare, finance and business.

Deep Learning

Data Science & Analytics

Agentic AI

🌐 Services in English & Español

NEBULA
DATA STRATEGY LLC

What we do

Deep Learning Solutions

Custom neural networks for images, documents, text, biosignals and time series.

Data Analysis & BI

Clean, connected data and clear dashboards your team can act on.

Data Science & Predictive Models

Forecasting, risk scoring, classification and anomaly detection.

Agentic AI & Automation

LLM agents and multi-agent workflows that automate research, reporting and operations.

MLOps & Cloud

Production deployment on AWS with monitoring, drift detection and retraining.

Industries we serve

Healthcare

- Biosignal analysis (ECG, EEG, HRV)
- Medical imaging AI
- Clinical document automation

Finance

- Fraud detection
- Market & risk forecasting
- AI financial-analyst agents

Business

- Sales & demand forecasting
- Customer & operations analytics
- Workflow automation with AI agents

How we work

01

Discover

We learn your goals and assess your data.

02

Design

A clear plan: scope, timeline and success metrics.

03

Build & Deploy

We develop, validate and integrate into your workflow.

04

Support & Grow

We monitor, improve and train your team.

TOOLS WE USE

Python

PyTorch

TensorFlow

scikit-learn

AWS SageMaker

SQL

LangChain

LangGraph

CrewAI

Hugging Face

Docker

PROVEN IN PRACTICE

0.998

F1 score in credit-card fraud detection

0.94

recall predicting falls in elderly care

200K+

biomedical samples in cloud pipelines
